Education

Ontario Tech University
Bachelor of Information Technology - Technology Management
GPA : 3.65/4.3
Awards : Dean's Honors List (Since 05/2020)

Oshawa, ON
September 2021 - April 2024

Objective

I am majoring in Technology Management which focuses on data analytics, information systems, change management, and data security. My goal is to pursue a career that allows me to expand my knowledge of these fields, learn new technologies, and apply my problem-solving, collaborative, and leadership skills.

Availability

Available for 4-12 months beginning Summer 2023

Work Experience

Customer Solutions – Co-Op May 2022 – Present
The Coca Cola Company, Toronto, ON

- Assisted in a variety of projects that enhanced supply chain efficiency and resulted in more **than \$2 million** cost savings.
- Supported in driving continuous **improvements** and **process innovation** around direct shipment, load optimization & order management
- Collaborated and planned jointly with sales and the customer to **optimize sales** while maintaining customer's targeted key performance indicators
- Facilitated Coke Sales and supply planning teams to provide customer order projection/forecast to **improve availability and inventory**

Sales Associate August 2021 – March 2022
Zara, Toronto, ON

- Helped consumers purchase online using online platforms, resulting in **over \$1000** in sales every month.
- Assisted customers daily to find products which have **generated additional sales** and enhanced customer experience.

Merchandise Associate May 2019 - October 2019
Canada's Wonderland, Vaughan, ON

- Provided **fast, friendly service** and **accuracy** in handling customer transactions to avoid any variances.
- Stocked merchandise, clearly labeled items, arranged items according to size and colour, and **prepared attractive displays to help customers** find products.

Leadership Experience

Analyze Dataset Using Machine Learning Algorithms (Team Project) September 2021 – December 2021
Project Team Leader, Oshawa, ON

- Loaded the dataset and designed graphs by implementing built-in **Python libraries**
- Used machine learning algorithms such as **Deep Neural Network, Artificial Neural Network, Decision Tree, Gaussian Naïve Bayes** to analyze the dataset and expose the patterns
- Created a detailed report and presented the analysis of produced results to conclude the details about the dataset.

Implementation of a Cloud and DevOps Technology (Team Project) September 2021 – December 2021
Project Team Leader, Oshawa, ON

- Researched and implemented **cloud technology** on **Microsoft Azure environment**
- Helped Reduce overall **Operating Expenses and Capital Expenses** using the **cloud environment**
- Designed a detailed presentation about the **performance analysis** of the technology and justification of why the technology should be used
